

## ASSESSING & PREVENTING AKI: *Clinical and Economic Impact in Modern Practices*

**Studies Presented at Major Conferences have shown 34-66% Reduction in Moderate/Severe AKI**

An Accredited CRSA Symposium Presentation

**How would your team manage critically ill patients differently if you had advance warning for Acute Kidney Injury risk that wouldn't elevate serum creatinine for 12-48 hours?**

Join us for an informative discussion to review how doctors are changing patient outcomes with new interventional strategies and multidisciplinary collaboration.

### FEATURED SPEAKERS

**CLAUDIO RONCO, MD**

Director, Dep. of Nephrology & Transplantation, IRRIV

**JOHN KELLUM, MD**

Director, Center for Critical Care Nephrology

**IVAN GÖCZE, MD**

Center for Clinical Studies, University MC Regensburg

**MODERATED BY HAROLD SZERLIP, MD, VICE PRESIDENT, CARDIO RENAL SOCIETY OF AMERICA  
DIRECTOR OF NEPHROLOGY, BAYLOR UNIVERSITY MEDICAL CENTER**

**WEDNESDAY, JUNE 13, 2018, 11:30AM  
36TH VICENZA COURSE ON AKI & CRRT**

SHIFTING THE PARADIGM  
TO PREVENTION OF

# AKI

## Why Acute Kidney Injury Matters:

### WHY AKI MATTERS:

STRIKES IN  
**1/2**  
OF ICU  
PATIENTS\*

**2-3x**  
INCREASE  
IN HOSPITAL  
COSTS\*

LONGER  
HOSPITAL STAYS  
**+5.7 days\***

**10-fold**  
RISE IN HOSPITAL  
MORTALITY\*

**9x**  
HIGHER RISK OF  
CHRONIC KIDNEY  
DISEASE (CKD)\*

**2-3x**  
GREATER  
READMISSION  
RISK\*
